

Appl No. 10/667,211
Response dated March 8, 2005
Reply to Office Action of Nov. 16, 2004

IN THE SPECIFICATION:

Please amend the specification as follows:

Please amend page 1, line 32 to read as follows:

Baseball caps have a rigid brim that functions as a sail when exposed to high winds. In such a situation, the brim is commonly pulled and blown backward removing the entire hat ~~hat~~ from the wearer's head.

Please amend page 5, line 26 to read as follows:

The cap 10 of the present invention is reversible as shown in Figures 1 and 2, providing a first layer 12 that can be exposed during use (Figure 1) and a second layer 13 that can be reversibly positioned to be worn externally as shown in Figure 2. When the second layer 13 is exposed, the first layer 12 forms a concavity 25 that conforms to a wearer's ~~wear's~~ head, the concavity 25 being seen in Figure 3.
